Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-7 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) are found to be non-statutory subject matter.

For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts. In the present case, claims 1-7 do not recite any structure or functionality to suggest that a computer performs the recited functions. The claimed graphical user interface is only used in a trivial manner as to only provide a display to a user. Thus, claims 1-7 are rejected as being directed to non-statutory subject matter.

Allowable Subject Matter

2. The prior art taken alone or in combination failed to teach or suggest displaying via a graphical user interface, a first weather favorability map of the geographic area that displays the weather favorability for the specific product, within the product category, for each day within the future time period as recited in claim 1.

The prior art taken alone or in combination failed to teach or suggest a graphical user interface connected over a network to the application database, capable of displaying weather favorability maps for each of the plurality of products in the geographic area during each day of a user specified future time period as recited in independent claim 8.

The prior art taken alone or in combination failed to teach or suggest code means for causing the computer to display to the user, via a graphical user interface, a weather favorability map that displays the weather favorability for the specific period, within the product category, for the geographic area and for each day within the future time period as recited in independent claim 11.
